

MOLYDUVAL

Orgon U Spray

Non Flammable Welding Spray

Helps keep both mig & tig gun nozzles from clogging. Extends the life of welding tips. Helps provide cleaner & neater welds. Eliminates need for chipping, grinding or scraping off weld spatter. Prevents damage to the surrounding surface caused by flying weld spatter. Allows surfaces to be painted after welding. Allow easy removal of weld spatter from metal surfaces. Used by industrial plants, steel mills, ship yards, metal fabricating, robotic welding, maintenance companies & auto body shops. Contains non flammable gaz.

Characteristics

- good lubrication performance
- biodegradable
- free of silicones
- good separating properties
- good moistening
- ecologically safe
- free of solvents
- enables painting or printer of tools
- high percentage of effective substances
- inflammable aerosl gas (N2)
- contains water

Applications

- as release agent in MIG or MAG welding
- as release agento for welding robots
- as release agent in electric welding

Technical Datas

Color		white
Basis		Ester, native
Viscosity 40°C	mm ² /s	1,6
Density 15°C	kg/m ³	990
Propulsant		nitrogen
Pack Size spray can 400 ml		+
