

# MOLYDUVAL

## Tutela 1 HGL Spray

### Corrosion Preventive Spray

New long-time indoor corrosion preventive with ultra thin protection and slide film. Suitable for tools and work pieces, which should be provided with a thin but stable protective film. Special usable for lubricating and preserving tools, screws, machine parts, also as rust protecting agent. Caused by its water repelling properties it may also be used for wet pieces or pieces being stored in humid surroundings.

### Characteristics

- good anticorrosive properties
- resistant to water
- form tight film
- extremely high penetrative properties
- very good water resistance
- Protection duration information: Any protection durations given below are estimated or achieved in specific applications. These may differ drastically in other applications or under other conditions. The values given are therefore only intended as approximate guidelines to make it easier for you to choose from our product range. Actual protection durations for specific applications and conditions must always be determined in practice.
- easy to remove

### Applications

- for instruments in precision engineering
- for lubrication and preservation of machine parts, screws, valves, nuts, bolts, springs, hinges, locks, etc.
- for textile machinery
- for protection of tools and instruments in storage
- for protection of metal surfaces such as dies and moulds against corrosion during storage and transport
- for protection of steel tubes and profiles at outside storage
- for preservation of machines, gear boxes, turbines, vehicles, agricultural equipment
- for conservation and lubrication of wire ropes
- for chains in precision engineering
- for the preservation and sealing of cavities.
- as preventive in wire drawing

### Technical Datas

Color		green
Density 40°C	kg/m <sup>3</sup>	810
Temperature Range	°C	-20 -> + 130
film type		soft wax
Pack Size spray can 400 ml		+

*The indicated service temperatures are guide values depending on the lubricants composition and on the application. They may vary in case of special influences or ongoing use.*
