

VIA WIPES

VIA WIPES are durable and multifunctional wipes for intensive cleaning, designed to effectively dissolve and remove dirt - such as oils and fats, resins, paint residues, lubricants, tar.

Main features

- *Two layers - an abrasive layer for scrubbing away dirt, and a soft layer for wiping the surface.*
- *Durable and stain-resistant - the wipes won't tear, even when cleaned with liquid.*
- *Effectively cleans metal parts, tools, workshop surfaces, machinery, car parts and more.*
- *Suitable for both light maintenance and thorough cleaning after repairs, chemical treatments or work with oils/liquids.*
- *Wipe size: 200 × 210 mm - large enough to clean both hands and larger surfaces; package: 75 pieces.*

Instructions for use

- 1. Remove the desired wipe from the package.*
- 2. Use the abrasive side to scrub the dirty surface or part — dirt, grease, oil, etc.*
- 3. Then wipe with the soft side to leave the surface clean and residue-free.*
- 4. No additional water or chemical solutions required - ideal for use in workshops, car services, construction, and manufacturing plants.*

Recommended use cases

- *Car services and mechanical workshops - for removing oil and grease stains from tools, parts and surfaces.*
- *Industry and manufacturing - for the maintenance and cleanliness of machinery and equipment.*
- *Construction and renovation work - for cleaning concrete, paint, glue residues.*
- *Crafts and workshops - ideal universal work wipes for equipment and surface care.*

Applications and industries

- In the transport industry, railways, shipbuilding.
- Food production.
- Remote workshops.
- Road construction and building.
- Agriculture.
